

Pocket Rainbow Pocket Selector K1C2 \$7.00 [950-1303](#)

This is a tool for the color inept (which is the category I fall into for sure!). A clever color wheel that incorporates a multi-level choice scheme by which you can take one color and choose proper additional colors to "match." It does take a little work to succeed with the wheel, but I think it's worth it, and I think it will help those of us who have made bad color combination choices in the past avoid those mistakes in the future. It is also a very nice way to introduce color theory, so I would also use this tool with juveniles beginning to work with color. Give it a try!
