

The Art of Feltmaking Anne Vickrey \$26.95 950-426

I like books that are more than they seem. I thought this was just a children's project book using dyed and undyed bits of fleece and rudimentary felting techniques to make beads and figures. After a closer look, I started seeing the abundance of useful felting lore from around the world. After the simple children's work come the Swedish and Nomadic coats, boots, etc. All this information with nice color illustrations of articles and techniques will make teachers happy and wool artists inspired by this ancient craft.
