The Beader's Companion

Judith Durant/Jean Campbell

\$23.95

The little gem holds a wealth of the basic how-tos that are usually scattered throughout other publications on beadwork. Illustrated with softly shaded drawings in black & white, the contents give clear attention to describing types of beads, their finishes, and the best threads and needles for sizes and usage. Half of the book is devoted to beadwork techniques that include off-loom, loom, stringing, embroidery, knitting, crochet and finishes. The sections on findings and wirework are best covered in other books, but don't let that deter you from adding this supremely spiffy handbook to your travel bag.
