A foundation in the history of textiles as made by all people since mankind learned to create textiles is a good thing to strive for as we work in our textile media or study textiles in general. This book is an overview of textiles place in human history. It's a textbook in textiles place in human history and it's an overview of textile techniques used today, but rooted in the not-so-distant pre-industrial past. Concise is in the subtitle, but this an awesome study of our textile heritage, with enough photo illustrations to make this a standard reference in your guild or personal library.
