The folks at Weaver's Magazine have been inspiring us through their magazine and these really wonderful "Best of..." books for many years. This one does the trick for those of us interested in this area of thick, textured, sturdy weaves. This set of patterns include ribs and cords, honeycomb and waffle weave, pleats, and seersucker. The beginner weaver will find clear instructions for projects that will set them on a sure path to understanding this area of weaving. The advanced weaver will find patterns to stimulate and expand their understanding of these complex weaves where they can use as many harnesses as are available.
