

Colour-And-Weave II Margaret B Windeknecht

\$26.00 950-259

This is the result of 14 years of additional study since the author first published "Color and Weave I" (out of print since 1986). This book explores an almost infinite number of color-and-weave effects in a wide variety of weave structures including plain weave (such as log cabin, shadow weave, rep weaves), twill, block weaves, and warp-faced and weft-faced weaves. Also included are chapters on isolating color-and-weave effects, achieving other unusual color effects, and generating color-and-weave graphics.
