

Mastering Weave Structures (hardcover)	Sharon Alderman	\$47.95 950-751
Mastering Weave Structures (softcover)	Sharon Alderman	\$37.95 950-751a

This book is as crisp and clean as a damask tablecloth, as deep as a 16 harness waffle-weave towel, as durable as a 24 harness figured twill, as contemporary as a computer generated network weave. Not specifically a book of pattern weaves or a beginning weavers how-to reference, it is much more. Simply put it is a textbook on the weave structures available to harness-loom weavers. What a difference the author's weaving and teaching experience and the publishing skills of Interweave Press, make in presenting to the serious weaver this life long reference work on woven structure design. The traditional patterns are developed here, but with the purpose of making them available to the weaver to develop just the right structure for the material and purpose of their projects. We don't say this about all the books we see, but this one, is a classic reference and textbook.
